SIGN BOARDS FOR TORRANCE

On the south side of Torrance is Lomita—a settlement of progressive citizens that do things that are worth doing. There is J. A. Smith, who is making Lomita Prosperous and famous by spending all his money and time in boosting W. A. Renn is not afraid to put his money into a business and expand by building business blocks that would be of credit to any good sized city. The "Lomita News Letter" keeps the presses going day and night—overtime and all the time. George Towne keeps the roads in perfect condition. They also have a boy scout brigade; the camp fire girls—and by the way—citizens of Torrance do you know that Torrance is in great part responsible for this wonderful progress.

All around Torrance and practically at the head of every road that leads to Torrance are the big signs of "Hammerton" and just as you enter Torrance proper, a big "Hammerton sign hits you right in the face, and not a Torrance sign is to be seen—unless you turn twice around and put a double twist in your neck—then you will see the name of Torrance on the P. E. Depot. We have a big job in Torrance to do. We have some property in Torrance and we think a lot of every inch of it, and we know that every property owner in Torrance feels the same way. There are a number of things that need attention, right now, one of them being, more signs, to direct the traffic to Torrance. We must not fall asleep at the switch or we will get sidetracked. Small "finger" signs must not be erected, but prominent signs, electrical signs—and they are not improbable. Every man and woman who owns property in Torrance, every business man and even renter could well afford to contribute liberally to such a fund. The Torrance Chamber of Commerce ought to start the ball rolling and as a member of that organization, I herewith start the subscription with \$10.00.—W. T. Klussman.

IN MEMORY OF OUR FRIEND EDWARD DOBLE

Once upon a time a young man started out in life, from one of the Eastern States, and proceeded to fit himself in one of the mechanical trades. He was not exactly a poor boy, as he came from a well-to-do family and had never known what real want was. He always worked—along with his fellow men at the bench or anvil. But his ability at his trade brought him in contact with men who noticed he had some exceptional talent. This young man had perfect health, physically strong in body and alert of mind and spirit, and possessed a character of the highest integrity. He made a silent resolution to himself and the only witness thereto was his God and this resolution he carried out and lived up to it until he was carried to the far land, from whose bourne no traveler returns.

After coming west he made money, friends and gained position in the business world. Strength, ability and character were dominant factors with him and he was recognized until he rose to the head of the Union Tool Company. This man was Edward Doble, who will always live in the minds of his thousands of employees as a big-hearted man. To his co-workers and those directly interested with him he imparted the spirit of his ideals and today Mr. Doble lives again in the memory of his employees, their wives, mothers, children and others as they received a paid up Life Insurance policy, free of charge. Let us be grateful. Let us be thankful to Mr. Doble. Let us bow our heads and offer a silent prayer to the Almighty for the repose of his soul.—Correspondent of the Torrance Enterprise, who is employed in the institution.

LET'S BUILD A HALL

If the roof had been put on the Auditorium Building, first, and the excavating part done last. The subscribers interest to the affair would not dry out in summer time or get wet in the winter season. (I bet a million "John Gates" used to eat a fifty Dollar Bill in a Ham Sandwich). We have seen him do that, at the Congress Mine in Arizona.

We'd rather invest it in Auditoriums, at least it gives us a chance to look at it once and a while and all the time.—W. T. Klussman.

LOUD HORN GOOD INSURANCE

"A horn on your car that can make a sufficient volume of noise to be heard around the curve of a mountain is one of the best forms of insurance against accident that you can carry on your motor trips this season," says P. E. Hennis of Gardena, local distributor of the Studebaker Light Six.

"Though you may drive as carefully as you can, you cannot always protect yourself against the driving of the other fellow, unless you give him warning before you come to the curve."

Mr. Hennis takes a great deal of pride in driving about with his friends and others who are interested in the "Studebaker Light Six" and he never runs down in enumerating its many good points—and noiseless engine.

Uncle Sam does not tolerate the Commercialization of the Post Office. We heard our Post Master, Mr. Gourdiere explain the law to that effect to a certain business man the other day. A heavy penalty is attached thereto for any one to get addresses from the Post Office or for the Post Master to give addresses.

Let every eye negotiate for itself, and trust no agent. Be thou familiar, but by no means vulgar.

The blood more stirs to rouse a lion, than to start a hare.

A man loves the "meat in his youth, that he cannot endure in his age."
